Cryolipolysis & EM Sculpting Technology

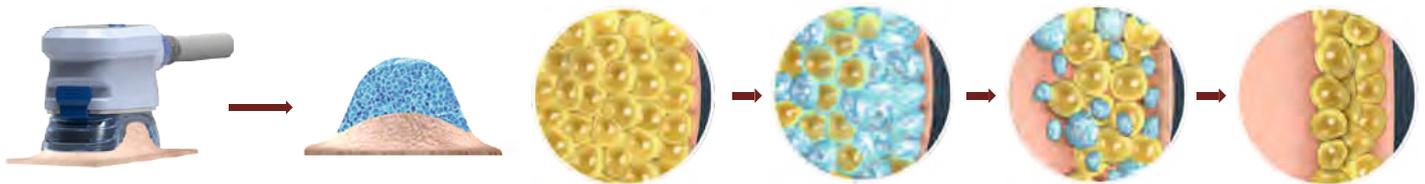

Coolslim-EMS

Cryolipolysis & EM Sculpting Technology

The Coolslim EMS + Cryo machine is an innovative, multifunctional device that combines two of the most popular and advanced body contouring technologies—cryolipolysis (fat freezing) and high-energy electromagnetic muscle stimulation (EMS) target both fat Targets Reduction and muscle building. This professional-grade equipment provides a non-invasive solution to body sculpting, making it suitable for aesthetic and medical clinics looking to offer their clients effective body transformation treatments.

How Does It Work?

Fat Reduction Through Cryolipolysis

Muscle Building Through EMS

New Generation 360° Degree Handpiece

255*65*47mm

CryoFit

220*73*50mm

CryoCore

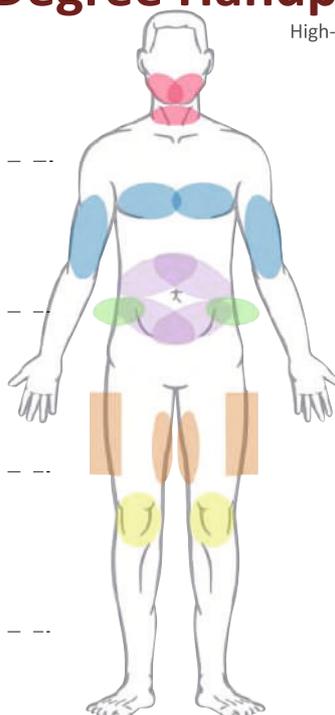

CryoCurve

140*55*45mm

CryoCurve

High-definition touch screen
Screen size 3.5inch

Medical soft silicone material

Replaceable contours

Change contours with ease

Contours are securely fastened to the handle quickly, very convenient for different areas treatment

Technical Specifications

Cryo Temperature	-18°C~5C(adjustable)
Sizes of Handle	A Handle: 235*65+47mm; 235*74*34mm; 255*65*55mm; 255*78*40mm B Handle: 180*65*50mm; 190*65*55mm; 210+65*70mm; 220*65*80mm C Handle: 125*50*45mm; 135+50+50mm; 145*50*70mm D Handle: 83*30*50mm
Vacuum	0-100Kpa
EMS Frequency	1-150hz
Power	5000w
EMS Intensity	7 Tesla
Screen	12.4inch
Pulse width	310μs±10%
Cooling	Air Cooling
Voltage	AC220V±10% 10A 50HZ , 110v±10% 10A 60HZ

Treatment Scope & Results
