

NEOS-3D

High-Intensity Focused Ultrasound (HIFU)

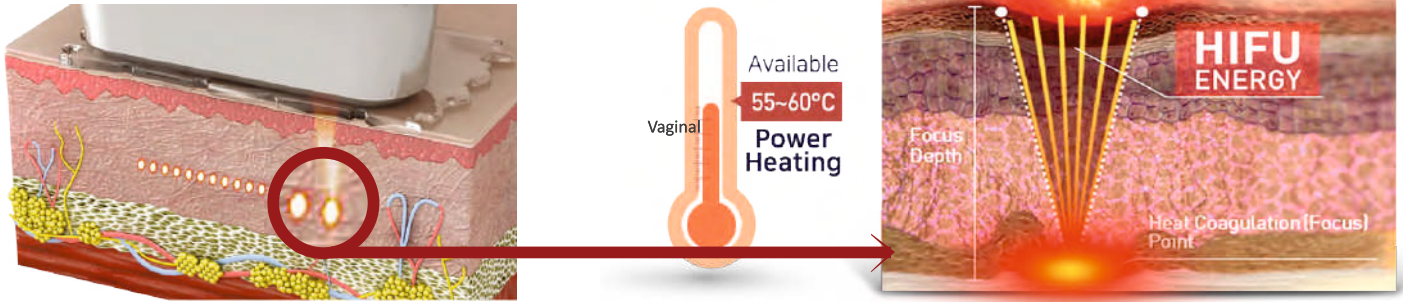

NEOS-3D

High-Intensity Focused Ultrasound (HIFU)

NEOS-3D is High-Intensity Focused Ultrasound (HIFU) technology, which can stimulate and induce neo-collagenases to replenish collagen in the skin; it also improves texture and decreases sagging. It transfers heat energy directly to the skin and subcutaneous tissue, resulting in facelift or body lift results without using invasive surgery or injections. This treatment has no downtime, which is an additional benefit and can be applied on the face and the entire body. Unlike lasers and powerful pulse lights, it is also effective on people of all skin tones.

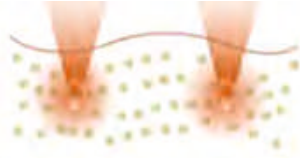

How Does It Work?

For Lifting & Tightening

The dermis layer of the skin naturally synthesizes less collagen over the course of time.

Focused ultrasound waves deliver energy directly within the skin layer, causing a shrinking effect.

Stimulated by the focused energy, skin collagen starts to regenerate.

Through the regeneration of collagen, wrinkles are eliminated in the process of both firming and tightening the skin.

For Slimming & Contouring

The dermis layer of the skin naturally synthesizes less collagen over the course of time.

The HIFU energy destroys the fat cells that have been targeted.

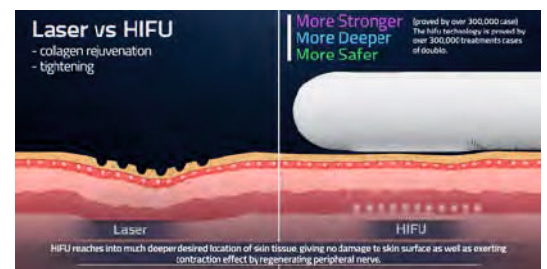

As a natural healing response of the body, the cells regenerate joining together to fill the gap.

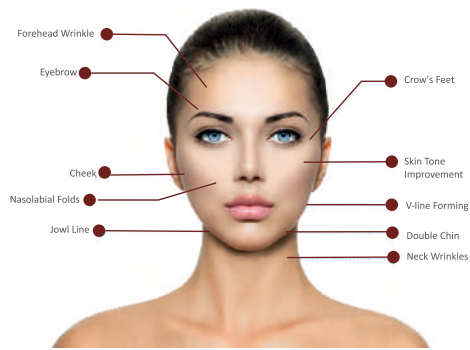

In result, the layer of fat naturally exits the body delivering a smooth, contoured body line.

For Vaginal Tightening

Technical Specifications

Power	1200 W
Frequency	4 ~ 7MHz
Net Weight	25kg
Dimension	400*350*1060mm
Voltage AC	100-240v 50/60Hz

 Vmax single dot handle	 1.5mm, 3.0mm, 4.5mm	Eyebrow, Wrinkles around eyes, Wrinkles around mouth	
 3D HIFU handle	 1.5mm, 3.0mm, 4.5mm	Cheek, Forehead, Double chin, Neck wrinkles, V-line forming	
 Liposonix handle	 8.0mm, 13mm	Abdomen, Inner thighs, Outer thighs, Hips & Buttocks, Inner-arms, Breast	
 Vaginal handle	 3.0mm, 4.5mm	Vaginal tightening
